

IBC CONTAINER HEATER - HIBC/B

ADVANTAGES

The HIBC/B Drum Heater is used throughout the world in a multitude of industries from pharmaceutical, cosmetics to food. It is ideal solution for heating liquid materials and for reducing the viscosity of materials such as soap, foodstuffs, oils, grease, resins, paints that must be easily pumped or vacuumed.

CONSTRUCTION

Produced with a high quality and extremely resistant fabric, the heater incorporates, for each of the two heating sectors, a resistance of 1000W controlled by a capillary thermostat 0-40°C or 0-90°C. The drum heater is supplied with a simple and effective fixing system with traction belts for optimal installation. Additionally, it is supplied with its lid in order to increase the efficiency and keep warm the liquids inside.

CHARACTERISTICS:

PLUS

- Teflon / polyester insulation
- Double insulated construction
- Capillary Thermostat 0-40°C or 0-90°C
- Standard dimensions 1000L
- Customized dimensions on request
- With insulating thermal cover (lid) included
- Adjustable with traction belts
- Easy to install
- Supplied with 4Mt H07RN-F power cable
- With hooks for fixing to the container

DATI TECNICI

- Supply voltage: 110V or 230V
- Control temperature: 0-40°C or 0-90°C
- Mod.1000mmx4400mm 1000Wx2 1000L
- Protection class IP40
- Performance: water temperature from 15 ° C to 80 ° C in 56 hours using the insulating cover supplied as standard
