

INSULATION DRUM LEADS - HSHP/HISD/HTSD

This accessory has been designed to optimize the performance of the HSHP, HTSD and HISD drum heaters. The insulation lid reduces heat dissipation, reducing consumption and prolonging the heating effect of the drum heater even after it is turned off.

Designed for 200 / 220L drums.

In our R&D laboratories we have verified a 20% increase in the maximum temperature for the same time. The HSHP drum insulation lid reduces the melting time of the materials contained in the drum.

CONSTRUCTION

Built using polyester with flame retardant characteristics, silicone coated fiberglass fabric and PTFE materials.

CHARACTERISTICS

ADVANTAGES

- Reduction of thermal dissipations
- Less drum heating time
- Ideal for drums with top diameter <600mm
- Robust and easy installation
